

MASH

MASH is a silly game that can totally and accurately predict the future with absolute certainty. **MASH** is also a TV series set during the Korean War. You can get that one on DVD from Amazon.com. **Doug Fields** used this method to select his wife, and more recently to name his children. Here's how you can get in on the fun: **1)** fill in the blanks honestly, **2)** pick a number between 1-10, **3)** count and cross off where the magic number lands, **4)** repeat until there's one left from each category, **5)** welcome to your future!
